An afternoon Visit to Michelin Australia ! Wednesday 24th August 2016

The AFAS-Vic Committee is pleased to host a site visit to the Michelin Australia office in Port Melbourne, thanks to Cedric Binoit, the Managing Director.

Directions to the plant are attached to the email for your information.

This will be an afternoon excursion organised as follows:

3:45 pm: All gather at the Reception.
(51 - 57 Fennell Street, Port Melbourne, 3207).

4.00 pm: Company presentation by Peter Appleby, Product Inspector

Visit to the Training Centre

5.30 pm: Depart Reception.

NOTE: Parking is fairly limited around the office and we would ask that visitors do not park in the car park area immediately adjacent to the building as these are reserved for Michelin staff. The group may find parking spaces in the areas marked with arrows (under Ingles St bridge or on street outside Michelin) on the map below.

First in, best dressed as a maximum of 20 people.

Michelin Australia Pty Ltd was established in October 1997 to manage and develop the markets of Australia, New Zealand and the Asia Pacific region. Prior to this, Michelin tyres were imported by local distributors and have been present on the Australian automotive market since the 1940s. The products marketed by Michelin Australia today include tyres for passenger car, light truck, earthmover equipment, heavy truck and bus, agricultural and industrial equipment, aviation, motorcycle and bicycle. The Michelin Group is a global company headquartered in Clermont-Ferrand, France. Founded in 1880, the Michelin Group provides tyres to over 170 countries. Michelin are leaders in innovation and sustainable development for the mobility of people and goods. Michelin brothers André and Édouard embarked on a great human and industrial odyssey in 1889 – to develop modern transport solutions that assisted freedom and economic development through ceaseless innovation. Since then the Michelin brand has been associated with many industry and world firsts: the first detachable bicycle tyre (1891), the first paved runway in the world (1916), the first Radial tyre (1946) to just name a few.
