## A Visit to the Suez Recycling & Recovery Landfill

### Thursday 20th September 2018

The AFAS-Vic Committee is pleased to host a visit to this facility, with a presentation by Cameron Mcintosh, Landfill Manager, Suez Recycling & Recovery. The Hallam Road Landfill is the only major landfill in the south east of Melbourne. It is recognised by the government as a site of State significance. The landfill receives in excess of 550,000 tonnes of waste per year and is engineered to meet the EPA Best Practice Environmental Management guidelines. The site also features a public transfer station with reused goods shop, a product destruction unit that receives and recycles waste from the food and beverage industry and a landfill gas electricity generation power plant.

**SUEZ Australia & New Zealand - Resource Recovery, Recycling and Waste Management company.**

With more than 100 sites and facilities across Australia we make it easy for our customers to put their waste to good use. We find smart and reliable solutions to collect, recover and recycle waste into valuable resources to help protect our environment. (ex. SITA Australia). SUEZ is a pioneer in waste management technologies, and brings together global expertise, innovation and technical knowledge to deliver smart, proven solutions in Australia.

#### **smart cells® put waste to good use**

smart cells® are a sophisticated, highly engineered alternative to traditional landfill. smart cells® work like a giant battery, generating biogas which is harnessed into renewable energy to power homes and businesses across Australia.

#### **smart solutions to protect the environment**

SUEZ smart cells® utilise specialised liner systems designed to protect the environment and local plant and wildlife. Waste is safely and securely stored within the liner systems for future energy recovery. When waste is converted to energy at a SUEZ smart cell®, you can trust that it is being handled reliably and responsibly.

#### **SUEZ Water Australia - Committed together to water, a source of life.**

With more than 40 years of local experience in Water Management & Treatment Solutions, SUEZ provides smart, reliable water solutions tailored to help municipal and industrial clients achieve their unique business visions. Working with local authorities and industries to design, build, finance, operate and maintain plants, facilities and networks for drinking water production, desalination, wastewater treatment, reuse and biosolids management. SUEZ Water (ex. Degrémont Australia) is committed to being the leading provider of sustainable water solutions in Australia and New Zealand.

<b>WHEN:</b>	Thursday <b>20th September 2018</b>	RSVP before Friday 14th September 2018 to  Peter Tolé,                      Ph 03 9810 5724 (BH) Mobile 0412 435 344 Peter.Tole@advisian.com
<b>TIME:</b>	Start 3:00 pm – Finish 5:30 pm	
<b>WHERE:</b>	<a href="#">Hallam Road Landfill</a> 274 Hallam Road, Hampton Park.	

# Hallam Road Landfill

The site is located at 274 Hallam Road, Hampton Park.

Parking is available at the Education Centre (marked in blue below), which is accessed by driving over the weighbridge and entering the carpark on the right.

Reverse parking only applies.

## Australia's most powerful battery

- smart cells® work like a giant battery
- waste is stored safely and securely within the smart cells®
- specialised layers protect the environment
- smart cells® convert waste into a renewable energy source
